How to Measure for Motorized FlexStyle with Coupler

Please Note: Measurements are required for ALL Installations! *Configurations will vary depending on site conditions.*

1. Find your installation's shade configuration below.
(2, 3, 4, or 5-Panel)
(Measurements must be in decimals.)
2. Use the interactive boxes to assist in measuring.
3. **Shade Panel Width(s):** Measure from the CENTER of a Coupler Bracket to the CENTER of the next Coupler Bracket.
4. **Motor End and Idler End Shade Panel Widths:** Measure from the CENTER of a Coupler Bracket to the OUTSIDE EDGE of Motor End or Idler End Bracket Cover.

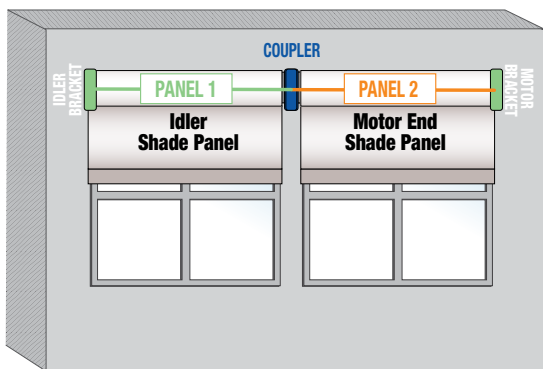

* This dimension may be larger, depending on motor selection. Contact Draper® for motor verification.

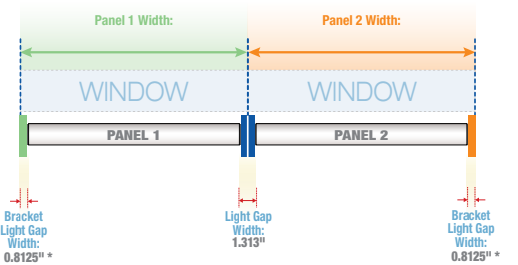

PLEASE NOTE: Measurements in fractions MUST be converted to decimals.
