

Extra Wide Viewing Cone/Typical Contrast/On-Axis Gain of 1.3

- 1.3 on-axis gain, Performance White.
- Projector brightness and screen size dictate the need for a modest increase in brightness.
- Performs best where ambient light is controlled.
- Typical contrast.
- Lens/Throw distance ratio for best uniformity: 1.1:1 or longer.

Surface Characteristics

- Maximum image height: 22' optically seamless.
- Weight (g/sm): 401
- Thickness (mm): .35
- Cleaning: Mild soap and soft cloth.
- Flame and mildew resistant.
- Composition: Flexible PVC.
- Also available in a nano perforated option up to 96" in height.

Reflective Performance*

- Gain Chart: See below.
- 0° Gain: 1.38
- Half Gain Angle: Material does not reach half gain.
- Never drops below a gain of 1.0

**Individual test results may vary slightly.*

TecVision® is an exclusive line of premium projection surfaces designed, formulated, and manufactured by Draper® to exacting standards for unparalleled uniformity, performance, and quality.

TecVision surfaces are available in 3 categories to fit any application:

- Reference Whites for dark spaces
- Premium Matte Greys for increased contrast in controlled light
- Ambient Light Rejecting (ALR) for uncontrolled light

All TecVision surfaces are 8K-ready and certified color-accurate by the Imaging Science Foundation (ISF).
